We claim:

- 1 1. A gaming device operation method, comprising the steps of:
- 2 receiving a loan request including a requested amount;
- sending a request signal communicating the loan request;
- 4 receiving an approval signal regarding approval of the loan request;
- establishing a balance that is not greater than the requested amount; and
- enabling a cash-out mechanism of the gaming device in accordance with the approval signal.
- 2. A method according to claim 1, wherein the step of establishing a balance comprises:
- establishing a balance that is equal to the requested amount.
- 1 3. A method according to claim 1, further comprising:
- determining an amount of loan issued that is less than the requested amount; and
- reducing the balance by an amount equal to the difference between the requested amount and
- 4 the amount of loan issued.
- 4. A method according to claim 1, wherein the loan request includes a player identifier.
- 1 5. A method according to claim 4, wherein the step of establishing a balance comprises:
- establishing a balance in dependence on the player identifier.
- 1 6. A method according to claim 1, further comprising the step of enabling play of the gaming
- 2 device by the player.
- 1 7. A method according to claim 6, wherein the balance is established and play of the gaming
- device is enabled before the approval signal is received.
- 1 8. A method according to claim 6, wherein the step of enabling play of the gaming device further
- 2 comprises disabling the cash-out mechanism of the gaming device.

- 9. A method according to claim 1, further comprising the step of adjusting the balance in
- 2 accordance with an outcome of play of the gaming device.
- 1 10. A method according to claim 1, in which the step of receiving an approval signal regarding
- 2 approval of the loan request comprises:
- receiving a signal representing an authorization code.
- 1 11. A method according to claim 10, in which the step of enabling a cash-out mechanism
- 2 comprises
- enabling the cash-out mechanism if the authorization code corresponds to a predetermined
- 4 code.
- 1 12. A method according to claim 1, further comprising the steps of
- determining an amount of loan issued based on the requested amount and the approval signal;
- determining an amount of loan due based on the amount of loan issued; and
- adjusting the amount of loan due based on an outcome of play of the gaming device.
- 1 13. A method according to claim 12, further comprising the step of
- determining an amount of loan repaid based on the adjusted amount of loan due.
- 1 14. A method of approving a loan request from a gaming device, the method comprising the steps
- 2 of:
- 3 receiving a loan request signal from a gaming device, the loan request signal representing a
- 4 loan request; and
- sending to the gaming device a signal indicating approval of the loan request,
- 6 wherein the loan request signal includes a requested amount, and the signal indicating approval
- of credit includes a signal enabling a cash-out mechanism of the gaming device.
- 1 15. A method according to claim 14, further comprising the step of:
- charging a credit card account by the requested amount.

- 1 16. A method according to claim 14, further comprising the step of:
- adjusting the credit card account in accordance with an outcome of play of the gaming device.
- 1 17. A method according to claim 14, further comprising the steps of:
- determining whether the player has an account chargeable by an operator of the gaming device,
- 3 based upon the player identifier; and
- 4 charging the account by the requested amount.
- 1 18. A method according to claim 17, further comprising the step of:
- adjusting the account in accordance with an outcome of play of the gaming device.
- 1 19. A method according to claim 14, wherein the loan request signal is received and the signal
- 2 indicating approval of the loan request is sent by an operator of the gaming device.
- 1 20. A gaming device operation method, comprising the steps of:
- 2 inputting a loan request to a gaming device to provide a loan to a player of the gaming device;
- 3 playing the gaming device;
- 4 receiving a signal indicating approval of the loan request; and
- 5 obtaining money from the gaming device using a cash-out mechanism therein, in accordance
- 6 with an outcome of play of the gaming device.
- 1 21. A gaming device operation method, comprising the steps of:
- 2 receiving a loan request including a requested amount at a gaming device;
- sending a first signal to a controller of the gaming device communicating the loan request;
- 4 receiving at the controller the first signal from the gaming device;
- sending a second signal to the gaming device indicating approval of the loan request;
- 6 receiving at the gaming device the second signal from the controller of the gaming device;
- 7 establishing a balance available to the player in accordance with the second signal, the balance
- being not greater than the requested amount;
- enabling play of the gaming device by the player; and
- adjusting the balance in accordance with an outcome of the play of the gaming device,

- wherein the second signal includes a signal enabling a cash-out mechanism of the gaming device.
- 1 22. A method according to claim 21, wherein the play of the gaming device is enabled before the
- 2 second signal is received.
- 1 23. A gaming device operation method, comprising the steps of:
- receiving a signal representing a request to cash out;
- 3 determining a balance;
- determining an amount of loan due;
- setting an amount to dispense based on the balance and the amount of loan due; and
- 6 dispensing the amount to dispense.
- 1 24. The method of claim 23, further comprising:
- setting the amount to dispense based on difference between the balance and the amount of loan
- з due.
- 1 25. The method of claim 24, further comprising:
- reducing the amount of loan due by the balance.
- 1 26. The method of claim 25, further comprising:
- 2 prompting the player to provide an additional payment amount equal to the reduced amount of
- loan due, if the balance is between zero and the amount of loan due.
- 1 27. The method of claim 26, further comprising:
- collecting the additional payment amount by alternate means if the additional payment amount
- 3 is not received within a predetermined amount of time.
- 1 28. The method of claim 27, in which the step of collecting the additional payment amount by
- 2 alternate means comprises:
- charging a credit card account for the additional payment amount.

- 29. The method of claim 24, further comprising: 1 reducing the balance by the amount of loan due. 2 30. The method of claim 23, further comprising: 1 requesting additional payment if the balance is not greater than zero. 2 31. A gaming device apparatus, comprising: a storage device; and 2 a processor connected to the storage device, 3 the storage device storing a program for controlling the processor; and 4 the processor operative with the program to: 5 receive a loan request including a requested amount; 6 send a request signal communicating the loan request; 7 receive an approval signal regarding approval of the loan request; 8 establish a balance that is not greater than the requested amount; and enable a cash-out mechanism of the gaming device in accordance with the approval 10 signal. 11 A computer readable medium encoded with processing instructions for implement a gaming 32. 1 device operation method, the method comprising the steps of: 2 receiving a loan request including a requested amount; 3 sending a request signal communicating the loan request; 4
- receiving an approval signal regarding approval of the loan request; 5
- establishing a balance that is not greater than the requested amount; and 6
- enabling a cash-out mechanism of the gaming device in accordance with the approval signal. 7
- An apparatus for approving a loan request from a gaming device, comprising: 33. 1
- a storage dévice; and 2
- a processor connected to the storage device, 3
- the storage device storing a program for controlling the processor; and 4
- the processor operative with the program to: 5

6	receive a loan request signal from a gaming device, the loan request signal representing
7	a loan request; and
8	send to the gaming device a signal indicating approval of the loan request,
9	wherein the loan request signal includes a requested amount, and the signal indicating
10	approval of credit includes a signal enabling a cash-out mechanism of the gaming device.
1	34. A computer readable medium encoded with processing instructions for implementing a method
2	of approving a loan request from a gaming device, the method comprising the steps of:
3	receiving a loan request signal from a gaming device, the loan request signal representing a
4	loan request; and
5	sending to the gaming device a signal indicating approval of the loan request,
6	wherein the loan request signal includes a requested amount, and the signal indicating approva
7	of credit includes a signal enabling a cash-out mechanism of the gaming device.
1	35. A gaming device apparatus, comprising:
2	a storage device; and
3	a processor connected to the storage device,
4	the storage device storing a program for controlling the processor; and
5	the processor operative with the program to:
6	receive a loan request including a requested amount at a gaming device;
7	send a first signal to a controller of the gaming device communicating the loan request;
8	receive at the controller the first signal from the gaming device;
9	send a second signal to the gaming device indicating approval of the loan request;
10	receive at the gaming device the second signal from the controller of the gaming device
11	establish a balance available to the player in accordance with the second signal, the
12	balance being not greater than the requested amount;
13	enable play of the gaming device by the player; and
14	adjust the balance in accordance with an outcome of the play of the gaming device,
15	wherein the second signal includes a signal enabling a cash-out mechanism of the
16	gaming device.

36. A computer readable medium encoded with processing instructions for implementing a gaming 1 device operation method, the method comprising the steps of: 2 receiving a loan request including a requested amount at a gaming device; 3 sending a first signal to a controller of the gaming device communicating the loan request; 4 receiving at the controller the first signal from the gaming device; 5 sending a second signal to the gaming device indicating approval of the loan request; 6 receiving at the gaming device the second signal from the controller of the gaming device; 7 establishing a balance available to the player in accordance with the second signal, the balance 8 being not greater than the requested amount; 9 enabling play of the gaming device by the player; and 10 adjusting the balance in accordance with an outcome of the play of the gaming device, 11 wherein the second signal includes a signal enabling a cash-out mechanism of the gaming 12 device. 13 37. A gaming device apparatus, comprising: 1 a storage device; and 2 a processor connected to the storage device, 3 the storage device storing a program for controlling the processor; and 4 the processor operative with the program to: 5 receive a signal representing a request to cash out; 6 determine a balance; 7 determine an amount of loan due; 8 set an amount to dispense based on the balance and the amount of loan due; and 9 dispense the amount to dispense. 10 A computer readable medium encoded with processing instructions for implementing a gaming 38. 1 device operation method, the method comprising the steps of: 2 receiving a signal representing a request to cash out; 3 determining a balance; 4 determining an amount of loan due; 5

dispensing the amount to dispense.

setting an amount to dispense based on the balance and the amount of loan due; and
